

All Parents and Staff of Clover Garden School

In compliance with the US Environmental Protection Agency (EPA) Asbestos Hazard Emergency Response Act (AHERA), we have had an inspection of our buildings. The results of the inspections are on file in the office.

All asbestos containing materials are in good shape, and do not pose a health risk for any occupants. We will continue to monitor all asbestos containing materials for safety.

Any questions about our survey and management of asbestos containing materials should be addressed to Mr. Levandoski.
